

How To Access Your Child's Report, Assessment Results and Other Learning Posts

We use HERO to publish reports, some assessment results, school involvement and participation information and learning posts from specialist teachers. Reports are published twice a year - mid year, and end year.

You will receive a notification on HERO when your child's report is published. The report can be directly accessed through the notification, or you can access it through the home page.

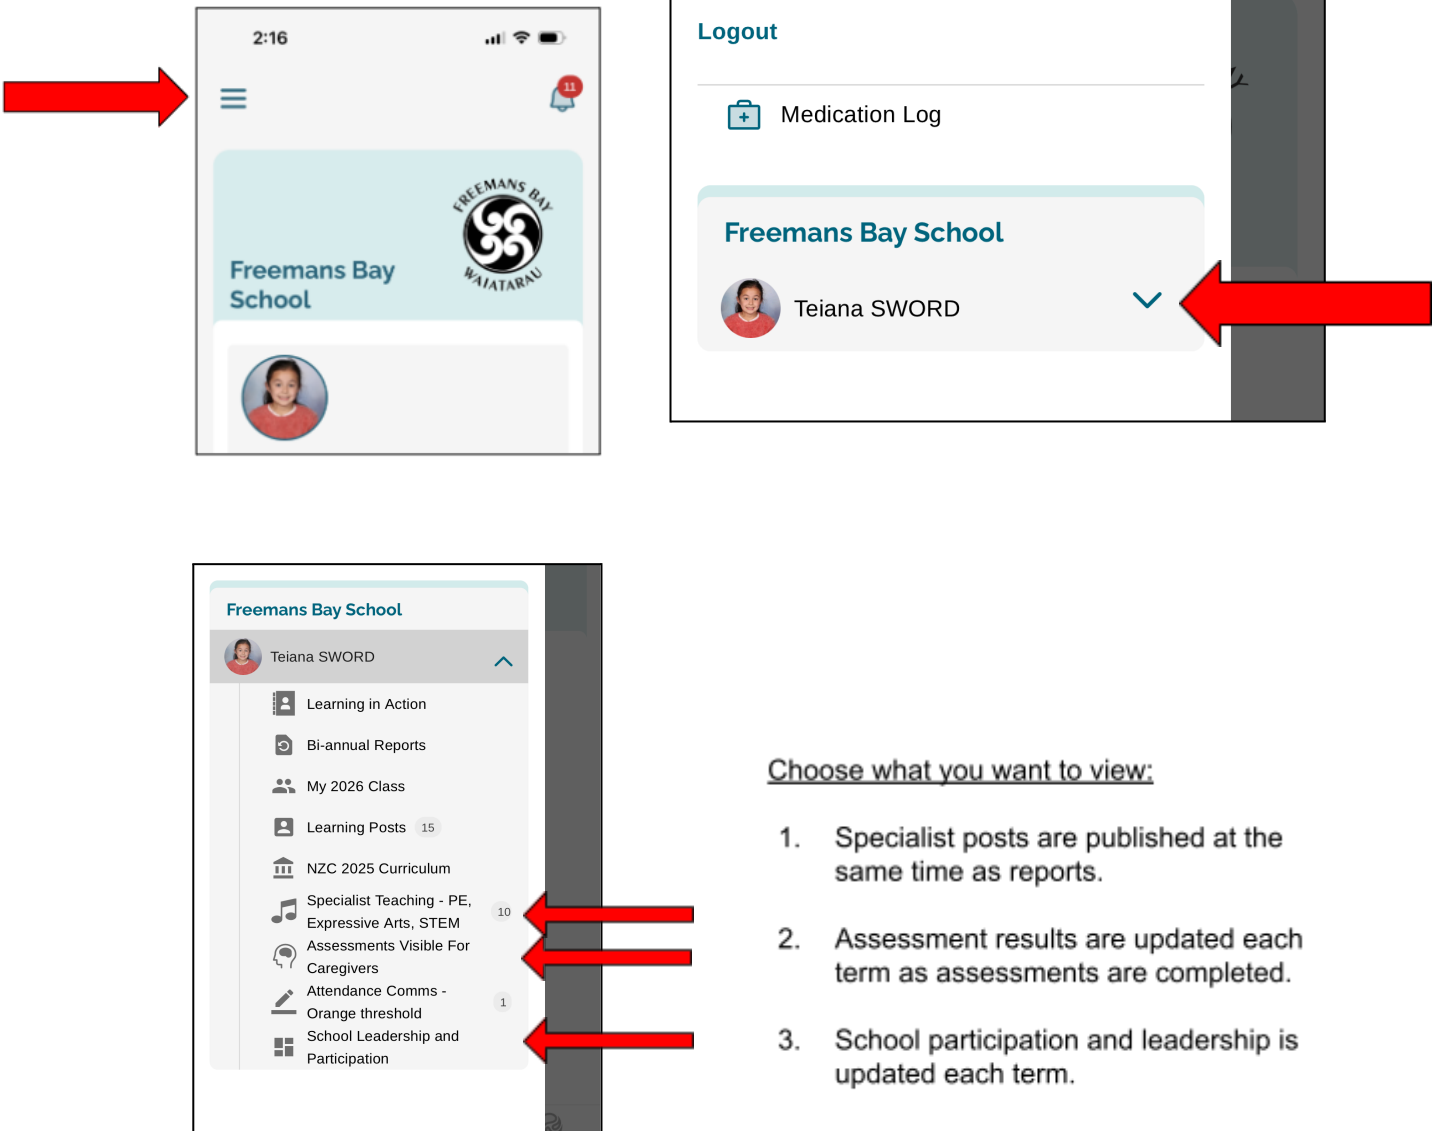

To access from the home page, click on the report icon. Choose the relevant link to read the most recent report.

To download the report to save a digital copy or to print it out, you need to be logged in through a web browser on your phone or a computer. At the moment, reports can't be downloaded from the APP.

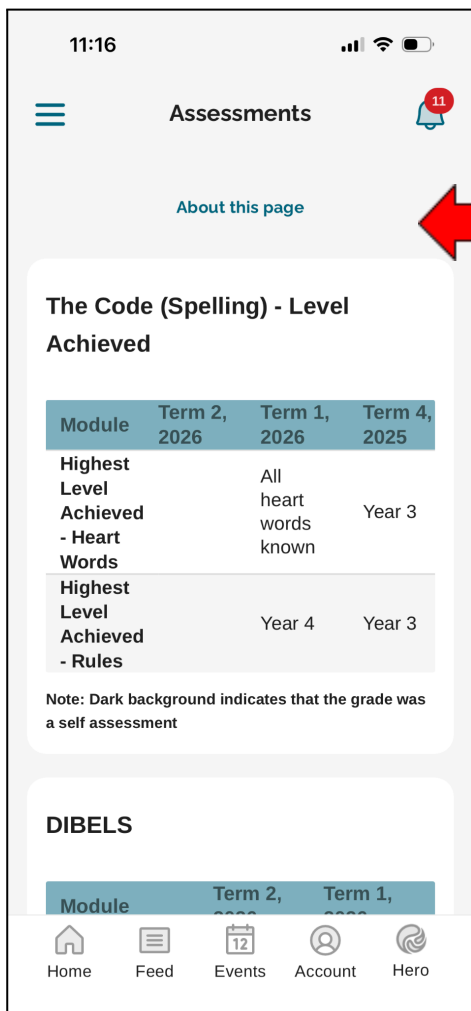

To see other information, click on the three lines on the home page. Then choose the child you want to view information for and click on the arrow.

Choose what you want to view:

1. Specialist posts are published at the same time as reports.
2. Assessment results are updated each term as assessments are completed.
3. School participation and leadership is updated each term.

Understanding Assessments

Click on ABOUT THIS PAGE to be taken to a slide show of information about each assessment and what the results mean.
